

## **IMPORTANT NOTICE**

Unfortunately we have received news today that the Passenger elevator on the Princeton side of the building, the #4 elevator, will be down for at least a week, maybe more. Parts have been ordered but due to supply chain issues, they have been delayed. We hope to have the elevator up and running by September 23. Until then, deliveries and moves will have to take place on the Harvard side of the building.

We thank you in advance for your patience and understanding.
